Date: December 1, 2009

To: OASIS SMS and AAB’s

Subject: IAQG OASIS Change to Add AABs

The following change is being implemented December 3, 2009 in IAQG OASIS (http://www.iaqg.org/oasis).

1. OASIS will now include also the Auditor Authentication Bodies (AAB).

The list of AABs will be visible on the public part, in a similar way as the National Accreditation Bodies (NABs) are visible.

The permissions for adding and maintaining the Auditor data (both AA and AEA) is organized in the following way:

a. If you were linked to the NAB and have access to any applications other than the Auditor Add/Edit applications, you are still linked to that NAB with access to those applications.

b. If you were linked to the NAB and had access to the Auditor Add/Edit application, you are now given access to the replacement AAB and its associated Auditor Add/Edit application. If you did not have access to any other NAB applications, your access to the NAB is removed, otherwise you still have access to the NAB’s applications that you had before.

If the auditor administrator has access to more organizations, he/she has to link him/herself with the related AAB, in order to have access to the Auditor Add/Edit application.

In case of questions, please contact the IAQG support function at: IAQGsupport@sae.org or your sector representative:
Americas – Becky DeGutis - bdegutis@sae.org
Asia/Pacific – Yoshitsugu Kanno - kanno@sjac.or.jp
Europe – Ian Folland - icfolland@btinternet.com

Sincerely,
The IAQG Database Team
